

# Enhance your Emergency Egress Safety Systems...

With the

# E-Lume-A-Path™

## Egress Marking System from E-Lite Technologies

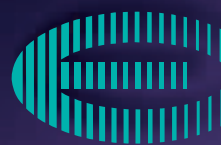

Provide an uninterrupted illuminated path to the nearest exit with a continuous light source located near the floor and around the doors of the appropriate emergency exit paths.

### State-of-the-art Electroluminescent (EL) Lighting Technology provides:

- Unsurpassed visibility in smoke or fog without disorientating bright spots of light
- Economical and Easy to install in new or retrofit installations
- Automatic Battery Backup in case of power failure

The **E-Lume-A-Path** system will supplement existing Emergency Exit systems for an unparalleled level of safety. Smoke rises, potentially obscuring traditional exit signs, so add a level of safety by lighting the path at lower levels.

Illuminated by **FLATLITE®**,  
The world's widest, thinnest,  
longest light bulb.™
